

**BADGERS**

**NEED YOU**

# BADGERS NEED YOU

**Although badgers are a protected species, they are under threat**

from

## **DEVELOPMENT**

housing, roads and railways lead to loss of habitat

## **TRAFFIC**

increased road use especially at night kills 50,000 badgers a year

## **PERSECUTION**

both sett digging and badger baiting

## **CULLING**

Government Badger Cull Policy is unsupported by science

**67,000 badgers have been shot since 2013**

**If the cull is extended in 2019 up to 42,000 more will be killed**

## **GET INVOLVED, HELP BADGERS NOW**

We advise people on how to lawfully and compassionately resolve issues with badgers, liaise with planners to ensure the badgers are considered in any development projects, advise on how to deal with injured badgers, and try to act as voices for the voiceless and advocates for these enigmatic and lovable fellow creatures

## ***Join Northumberland Badger Group***

We are friendly wildlife enthusiasts

**Please contact us if you think you can help in any way**
